Here's my review -- looks very good, I fixed some typos. Also changed statements about "X2 moving" to
LSZ moving" I did not correct some missing words in one spot marked with ???

great!

I'll review first thing. Are u able to put it on letterhead electronically as I'm working from home. If not, I'll see if Linda can do it for me when we are done. Thanks! Hope today's mtg went well.

Here is the latest. Tom, Valentina, and Bruce, thanks for comments. I accepted them unless I didn't understand what to do.

Other items that have changed:
Improved Roe Island language
Took out reference to FLaSH report and replaced with a link to the IEP agenda and abstracts. Presentations aren't posted. How lame is that?

Subject: how to present existing use, 90's and current % UIF in the letter.

Hey Erin/Bruce

Per our chat this afternoon I put together some sums of % UIF thinking we would put it into the letter tonight/tomorrow morning...however...it tells a weird story because flows go down and then up (2006 was wet and appears to be skewing it). I did both a % based on summing all the volume in all years in a period and then determining the % (first column) AND by averaging the yearly average. The current level of flow looks really high when you take total volume. Surprisingly high, considering the decreasing trend that we see in the graph. I am attaching the xls since webmail doesn't seem to let me cut and paste the graphic alone. Erin, the current version of the graph is on the "%UnimpairedFlowData" tab.

I can edit that graphic once we decide what particular range (or version of the math) we want to showcase. Whereas 1976, the existing us cut off year, was 64% UIF, the range 10 yrs preceding and following were much higher - 72% & 69%.

Interested in guidance about how best to present this information for the letter. I will be at work EARLY tomorrow...

--Valentina

	delta outflow	taf	UIF	taf	%UIF by total volume	averaging the yearly %UIF
1967-1976	234748	325217	72%	70%		
1977-1986	245012	354025	69%	63%		
1987-1996	122640	228985	54%	47%		
1997-2006	222774	341343	65%	61%		
1956-2010	1076166	1634208	66%	60%		
1976-2010	626932	1011227	62%	55%

Subject: a cleaner version of the letter

Hi Again,

Karen is at NRCS w/ Valentina and I'll see Bruce later today. Tom however is in the office again (welcome back!) so I thought he might like the latest version of our letter. Appendix A is a mess. I'm turning my attention to that now. Karen noted that we may be able to submit that later as it is for staff and the it is an informal workshop proceeding.

I'll stop editing it now and wait for comments.
